

Thank you for taking the time to look at my work. You spoke with Patty who works on marketing our studio as well as lead photographer on our portraits. I handle the illustrative techniques we are showing you today. Together we have been creating unique imagery for clients across the country for 20 years.

My greatest asset to you is my ability to interpret ideas, offer suggestions and develop an image which challenges the viewer to think and react.

My experience working in graphic design gives me insight into the challenges art directors face when juggling deadlines. It is this understanding which allows me to take a lead role in developing ideas into illustrations which sell the story.

My workflow is entirely digital allowing me opportunities to bend reality beyond one's imagination. I work in both a 2D and 3D environment, utilizing current technology to master the art of digital realism. Success is achieved by blurring the line between real and imagined.
